NUKUNESS

ACOUSTIC COLLECTION

DESIGN
CRAFTMANSHIP
ECOLOGY

Nukuness, from the Japanese word Nukumori (ぬもり), designates a state, a quality of coziness.

Generally used to express a sensation of warmth and soft comfort, this notion has a personal meaning, built through memories and experiences accumulated during life.

The collection is composed of four wall hanging sound absorbants, for private and public space use, made of wool felt material.

Produced in Finland, the high quality sound absorbants are characterized by their excellence in manufacture and delicate aesthetics.

ELISA DEFOSSEZ

Designer

Elisa Defossez is a Belgian-Japanese designer graduated from Aalto University.

Her approach blends Textile and Product design thinking.

« My interest and quest of coziness has always inspired me, guiding my intuition and plastic expression.»

NUKU *

*from the Japanese word
«Nukumori»

NUKU is a system of modular
acoustic elements for wall
covering.

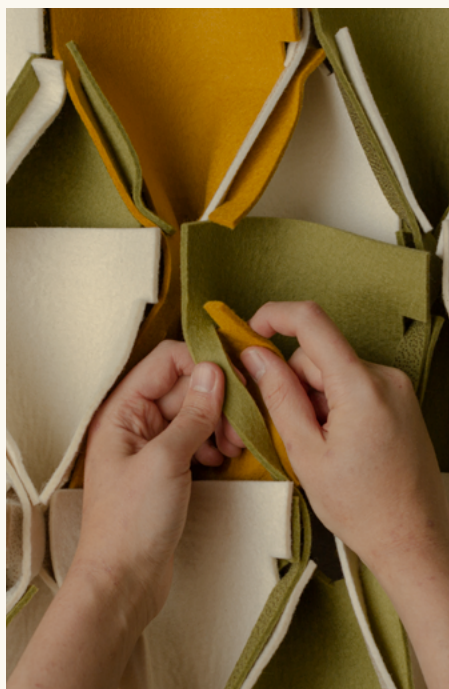

Simple square felt sheets are
pinched in their middle, in
such a way that they create
an organic shape.

Every single module has spe-
cific cuts on the edges, which
allows an easy and modular
assembling.

A medium grained pattern is
printed from top to bottom
of each module, emphasizing
the sensual organic volume
effect.

Picture: L size panel

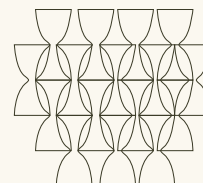

An ingenious cutting design allows an assembling and shaping without any additional material, giving the freedom of modularity.

Nukuness collection's atmosphere is inspired by the remembrance of a forest walk in ending summer period, with its warm melancholic feeling.

«Forest walks became for me a daily activity, in which I discovered a quality of quietness that makes me feel particularly peaceful. It is a soft, muffled sound, like the one perceived through the steps on the thick snow or the pine needles that cover the ground.»

- Elisa Defossez -

*from Japanese, meaning wave

NAMI is a wall hanging panel, made of felt strips interwoven in a background sheet, by using cutting edges pattern.

The fine-grained gradient printed on the strips emphasize the rounded volume effect, playing on the illusion between the real shadow of the pleats and the printed pattern.

The rhythmic pattern is made of three different stripes designs that are used in a regular order.

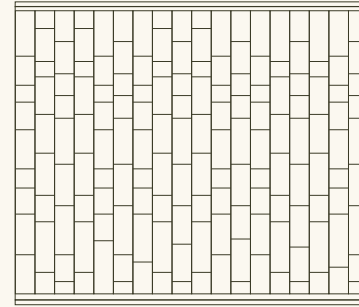

The cutting-interlocking assembling technique allows the product to be mono-material, which corresponds to the sake of sustainability values of the collection.

change

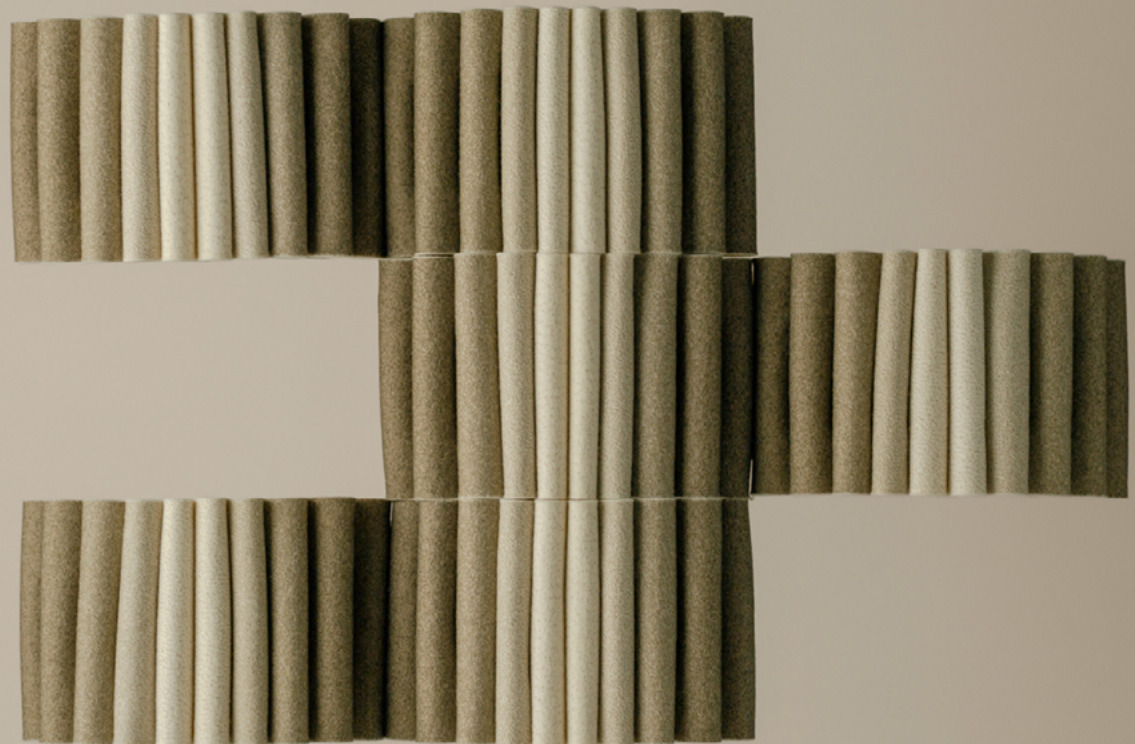

MUUTOS is a little wall
acoustic tile, which can fit to
any interior, allowing various
patterns compositions.

The folding curved structure
is made by pleats that are
fixed by an interlocking sys-
tem made of cuts in the felt.

The printed gradient on the
felt surface emphasizes the
curved volume perception.

The tiles can be arranged on
flat walls, on curved surfaces,
or pillars.

Valo is a wall hanging screen made of one single felt sheet. Valo can be used as a wall covering screen or as space divider.

Designed as a repeatable pattern, screens can be put next to each others, to create a continous surface.

The print pattern creates a blurriness, evoking soft glows sensation, from afar view.

Close to it, the vibrant texture invites to touch.

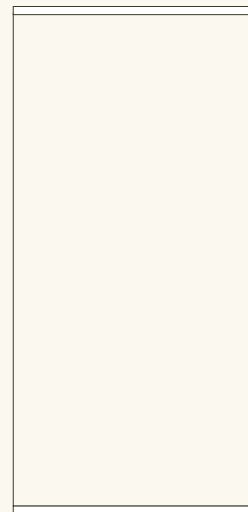

An innovative printing technology gives a vibrant texture to the material, inviting to touch the soft and warm felt material.
